extensin-like protein - maize
C;Species: Zea mays (maize)
C;Bacte: 05-Mar-1995 #sequence_revision 12-May-1995 #text_change 29-Oct-1999
C;Accession: S49915
R;Rubinstein, A.L.; Broadwater, A.H.; Lowrey, K.; Bedinger, P.A.
Submitted to the EMBL Data Library, June 1994
A;Description: Pex genes: pollen-specific genes with extensin-like domains.
A;Reference number: S49915
A;Accession: S49915

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Description

Sequence 756, Application US/09764868

Sequence 756, Application US/09764868

Patent No. US20020168711A1

GENERAL INFORMATION:

APPLICAMT: Rosen et al.

TITLE OF INVENTION: Nucleic Acids, Proteins, and Antibodies

FILE REFERENCE: PT232

CURRENT FILING DATE: 2001-01-17

Prior application data removed - refer to PALM or file wrapper

NUMBER OF SEQ ID NOS: 1510

SOFTWARE: PatentIn Ver. 2.0
